EDUCATION

- Bachelor of Technology (B.Tech.) in CSE(AIML) 2024
College of Engineering Roorkee, Roorkee

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, Java
- Database: MySQL, MongoDB, PostgreSQL
- ML Libraries: OpenCV, Pandas, NumPy, Scikit-learn, TensorFlow, Lang Chain, Py Torch
- Developer Tools: Git, GitHub, Docker, Postman, AWS
- Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Time Management

PROJECTS

AI Resume Analyzer | 2026

Technologies: Java, Spring Boot, HTML, CSS, JavaScript, H2 Database

[GitHub](#)

- Developed an AI-powered Resume Analyzer that parses PDF/DOCX resumes and automatically extracts candidate information, including contact details, education, experience, skills, and projects.
- Built ATS Resume Checker and Job Description Matching modules to evaluate resume compatibility, identify missing keywords, and generate profile completeness and match scores.
- Implemented AI-powered resume suggestions, advanced skills analysis, and an interactive dashboard with light/dark theme to enhance resume quality and user experience.

Healthcare Chatbot | March 2026

Technologies: Python, Flask, HTML, CSS, JavaScript, SQLite

[GitHub](#)

- Developed a healthcare chatbot that analyzes user-reported symptoms to identify potential medical conditions using an intelligent symptom-matching algorithm with confidence-based disease recommendations.
- Built a comprehensive medical database containing 370+ diseases, providing severity assessment, prevention tips, medication suggestions, specialist recommendations, medication reminders, user health profiles, and chat history management.

Chess Game | Jan 2025

Technologies: HTML, CSS, JavaScript, Java, Flexbox

[GitHub](#)

- Developed a feature-rich web-based Chess game implementing complete chess rules, multiple game modes, customizable board themes, time controls, and responsive gameplay using HTML, CSS, and JavaScript.
- Built a Java-based backend using HttpServer to manage game sessions and implemented AI opponents with four difficulty levels using the Minimax algorithm and board evaluation techniques.

EXPERIENCE

Software Development Intern

FUTURE – Remote | June 2026– July 2026

CERTIFICATIONS & WORKSHOPS

- Web Development Workshop – COER University | Nov 2024
- Hackathon 5.0 – COER University | Mar 2024
